## Qualification Description

This qualification is for those in waste management specialisation roles in waste collection, processing, minimisation and recovery operations in supervisory, leadership or sales roles. Waste management operations are undertaken across a range of government and private sectors involved in municipal, solid, commercial, industrial, construction and demolition waste management.

Individuals operating in these waste management specialisation roles apply solutions to a defined range of predictable and unpredictable problems and provide leadership and guidance to others.

Licensing, legislative, regulatory or certification requirements apply to the operation of waste management facilities by the respective environmental protection authority (EPA) in some jurisdictions and should be confirmed prior to commencing this qualification. For further information, check with the relevant EPA.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To achieve this qualification, competency must be demonstrated in 12 units of competency consisting of:

- 7 core units
- 5 elective units.

Electives are to be selected as follows:

- a minimum of 2 units must be selected from Group A
- the remaining units may be selected from Group A or Group B units not already selected
- up to 2 units may be chosen from any current training package as long as they contribute to a valid, industry-supported vocational outcome, maintain the integrity of the AQF level of this qualification and do not duplicate the outcome of another unit used to achieve this qualification.
