codes and risk management principles when
assessing buildings for access**

Release: 1

Assessment Requirements for CPPACC6002 Apply performance-based codes and risk management principles when assessing buildings for access

Modification History

Release 1 This unit first released with CPP Property Services Training Package Release 14.0.

Supersedes and is equivalent to CPPACC6002A Apply performance-based codes and risk management principles to assessing buildings for access. Minor change to unit title.

Unit updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying performance-based codes and risk management principles to assess access issues and performance solutions associated with two different buildings.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- anthropometric and ergonomic principles of accessible building design and fitout
- Commonwealth, state and territory legislation, regulations, codes and standards relevant to access consulting activities:
 - anti-discrimination and disability discrimination
 - building control including local government regulations and by-laws
 - heritage
 - National Construction Code (NCC) building classifications and access requirements
 - National Disability Insurance Scheme (NDIS) Specialist Disability Accommodation Design Standard (or its successor)
 - Livable Housing Australia Livable Housing Design Guidelines (or its successor)
 - principles of universal design
 - privacy and confidentiality
 - Process to Administer Access to Buildings (The Protocol) for the purpose of considering building upgrade plans
- industry codes of practice and ethics
- interpersonal communication strategies used to effectively relate to people from a range of social, cultural and ethnic backgrounds and with a range of physical and cognitive abilities

- recognised research methods and protocols and methods for referencing information sources
- risk management principles and risk assessment processes
- role, responsibilities and powers of building certifiers
- types of disability and limitations that each disability places on an individual's ability to access the environment
- workplace requirements for applying performance-based codes and risk management principles when assessing buildings for access:
 - documentation and records administration
 - quality
 - technologies and methods used to source, access and store information
 - work role boundaries – responsibilities, limitations and professional abilities.
 -

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to documentation, information and technologies required to achieve the performance criteria and performance evidence.
