Assessment Requirements for CPPBDN5110 Inspect and assess sites to inform the design process

Release: 1

Assessment Requirements for CPPBDN5110 Inspect and assess sites to inform the design process

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 11.0.

Supersedes and is equivalent to CPPBDN5007A Inspect and analyse sites and produce measured drawings for small-scale building design projects. Title adjusted to better reflect unit outcome. Updated to meet the Standards for Training Packages 2012.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by inspecting two sites for small-scale building design projects, each site having different features and characteristics and including the following:

- undertake a basic measure-up and a detailed site analysis
- produce measured drawings and documentation detailing site information and building elements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant measuring equipment and application:
 - measuring tape
 - laser distance measurer
 - string line
- contemporary, new and emerging measuring equipment used by building designers
- work health and safety (WHS) requirements for inspecting and assessing sites
- operating procedures for basic devices and measuring equipment
- architectural styles and terminology
- features of surveyors' drawings
- different sources of site information.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations. Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed. This includes access to:

- relevant documentation, including land title, site plan and registered surveyor's drawings
- relevant devices and equipment.
