Assessment Requirements for CPPBDN6101 Produce compliant designs for Class 2-9 buildings up to three storeys

Release: 1

Assessment Requirements for CPPBDN6101 Produce compliant designs for Class 2-9 buildings up to three storeys

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 11.0.

New unit.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by producing compliant building design drawings and presenting designs to clients for two different Class 2-9 buildings as defined by the National Construction Code (NCC). Each building must be of a different class and in different project locations and conditions. At least one building must be of Type A construction as defined by the NCC.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- architectural styles and building construction terminology relevant to working with building designs
- NCC building classifications
- legislation, codes and standards requirements for the design of Class 2-9 buildings
- contextual and site constraints that place limits on design options
- bushfire attack level rating
- features and impact of building life cycles
- design development and approval processes and implications of changes to design at each stage
- design brief format
- energy efficient design principles and sustainability considerations
- scientific and social principles of human interaction with the built environment
- construction materials and methods
- principles of design
- sketches, including plans, elevations and three-dimensional (3-D) views
- rendering techniques.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations. Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed. This includes access to:

- computer with internet access and building design software currently used in drafting and building design practice
- relevant legislation, regulations, codes and standards
- relevant client and project information.
