Assessment Requirements for CPPCMN4002 Implement and monitor environmentally sustainable work practices

Release: 1

Assessment Requirements for CPPCMN4002 Implement and monitor environmentally sustainable work practices

Modification History

Release 1.

Revised unit of competency replacing superseded equivalent CPPCMN4002B Implement and monitor environmentally sustainable work practices.

This version first released with CPP Property Services Training Package Version 3.

Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills and range of conditions of this unit.

The person must also implement three new strategies to support environmentally sustainable work practices. Each of the strategies must:

- relate to sustainability improvements in the use of the following resources:
 - consumables
 - electricity
 - gas
 - water
- specify:
 - current usage rates measured in quantities and cost
 - targeted usage rates and how these targets will enhance organisation's commitment to sustainability
 - methods for implementing each strategy
 - processes for documenting and monitoring strategy implementation.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- laws, by-laws, regulations and codes of practice relating to environmental sustainability and resource efficiency improvement
- types, limitations and uses of environmental and resource efficiency improvement plans, including:
 - environmental and resource sustainability initiatives, action plans, surveys and audits
 - applying waste management hierarchy in the workplace
 - determining organisation's most suitable waste treatment, including waste to landfill, recycling, re-use and wastewater treatment
 - initiating and maintaining organisational procedures for operational energy consumption, including stationary and non-stationary (transport) energy

- use of standards, guidelines and approaches:
 - energy efficiency rating systems
 - ISO 14001 Environment Management Systems.

Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
 - computer with internet access to retrieve and send company documentation
- specifications:
 - energy efficiency rating systems
 - ISO 14001 Environment Management Systems
 - existing company policies and procedures relating to sustainable work practices
- relationship with client:
 - consultation required.

Timeframe:

- according to workplace requirements.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.
