# **CPPDSM4055 Maintain asset management system**

**Release: 1**

# CPPDSM4055 Maintain asset management system

## Modification History

Release 1.

Replaces superseded equivalent CPPDSM4055A Maintain asset management system.

This version first released with CPP Property Services Training Package Version 5.

## Application

This unit of competency specifies the outcomes required to provide advice to set up a system of asset control that applies to all property assets. It requires the ability to classify assets in line with organisational requirements.

The unit supports workers in the property industry who are involved in developing and implementing maintenance programs for all types of managed properties. It applies to real estate agents, property managers, strata managers and facility managers.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States and Territories. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Strata community management

## Unit Sector

Property services

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |                                   |                                                                                                          |
|-----------------------------------|----------------------------------------------------------------------------------------------------------|
| 1. Determine system requirements. | 1.1. <b><i>Asset management system</i></b> requirements are determined.                                  |
|                                   | 1.2. Opportunities are given to colleagues and clients to contribute to identifying system requirements. |
|                                   | 1.3. Recommendations on system requirements are presented                                                |

- in required format, style and structure using relevant business equipment and technology.
2. Classify assets.
    - 2.1. **Assets** are identified and classified.
    - 2.2. Assets are recorded according to Australian accounting standards and legislative requirements.
    - 2.3. Level of security and disclosure of financial statements are determined.
    - 2.4. Reliable processes for classifying and recording assets are used, making efficient use of business technology and available time and resources.
  3. Monitor and report on asset management system.
    - 3.1. System effectiveness is monitored and evaluated.
    - 3.2. Feedback from client and colleagues is used to identify and develop improved systems.
    - 3.3. Existing technology is assessed against newly available technology to determine needs and priorities.
    - 3.4. **Asset information** is securely maintained with due regard to client confidentiality.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

| Skill                         | Performance feature                                                                                                                |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| Learning skills to:           | <ul style="list-style-type: none"> <li>maintain current knowledge of asset management systems and processes.</li> </ul>            |
