**Assessment Requirements for  
CPPPMT3002 Assess, advise on options,  
and develop pest management plans for  
complex or high risk operations**

# **Assessment Requirements for CPPPMT3002 Assess, advise on options, and develop pest management plans for complex or high risk operations**

## **Modification History**

Release 1.

Replaces superseded equivalent CPPPMT3002A Assess and advise on pest management options.

This version first released with CPP Property Services Training Package Version 2.

## **Performance Evidence**

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must:

- safely assess pest types and levels of activity at two different complex or high risk operations selected from the following:
  - aged care facility
  - childcare facility
  - construction project
  - education facility
  - food manufacturing premises
  - general manufacturing premises
  - health care facility
  - hospital
  - motel
  - recreational club
  - residential hotel
- propose two pest management options for each of the two operations selected, with:
  - each option involving a minimum of two of the following pest management methods:
    - biological controls
    - chemical controls
    - cultural controls
    - physical controls
  - all four pest management methods being used across the above four proposed pest management options.

In doing the above, the person must identify pest types and pest activity and propose pest management options for a minimum of four different pests consisting of:

- each of the following:

- cockroaches
- rodents
- as well as two of the following:
  - ants
  - bed bugs
  - flying insects
  - spiders.

Two or more pests may be identified as existing, or possible future, problems at one location.

In doing the above, the person must also:

- accurately confirm type of organism and its associated key behavioural characteristics, including activity and habitats, referring to experts as required
- achieve outcomes as specified in work orders
- communicate information and advice on pest management options suitable for the type of pest and premises
- comply with company and compliance requirements
- identify hazards and risks associated with pest management and apply knowledge of the hierarchy of hazard control
- inspect building and surrounds to clarify client's pest problem
- produce pest management plans that include biological, physical, chemical or cultural controls for all four pests
- select safe, effective and environmentally responsible pest management options.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- compliance requirements relevant to assessing and advising on pest management options
- content and industry terms used in work order specifications
- company policies and procedures relevant to developing a pest management plan, including:
  - emergency response procedures
  - integrated pest management strategies
  - pest assessment reporting
- the following aspects of pest assessment:
  - pest ecology relevant to pest management operations
  - types of pests relevant to the area and their life cycles, habits and harbourages
- pest management methods, including:
  - biological, physical, chemical and cultural controls associated with managing pests in a range of environments
  - product knowledge, including manufacturer specifications for equipment and products.

## Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - computer with internet access
  - inspection equipment and personal protective equipment (PPE) as listed in the range of conditions
- specifications:
  - client records
  - company procedures
  - plain English guides to compliance requirements
  - safety data sheets (SDS)
  - work orders
- physical conditions:
  - premises to be inspected and assessed as specified in the performance evidence
- relationships with team members and supervisor:
  - work must be conducted individually, under supervision
- relationship with client:
  - consultation with client required
- timeframe:
  - according to work order.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.
