Assessment Requirements for CPPPMT3018 Maintain equipment and pesticide storage area in pest management vehicles

Assessment Requirements for CPPPMT3018 Maintain equipment and pesticide storage area in pest management vehicles

Modification History

Release 1.

Replaces superseded equivalent CPPPMT3018B Maintain equipment and chemical storage areas.

This version first released with CPP Property Services Training Package Version 2.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must set up, stock and maintain a storage area in a pest management vehicle for pest management equipment and chemicals.

In doing the above, the person must also:

- apply knowledge as required of emergency response procedures specific to handling, managing and disposing of pest management equipment and chemicals
- apply safe work methods when:
 - handling, managing and disposing of chemicals
 - identifying hazards and controlling risks
 - manual handling
- comply with company and compliance requirements
- demonstrate good storage and housekeeping practices, particularly those relating to the labelling and security of chemicals
- identify hazards and control risks associated with pest management equipment and chemical storage
- identify vehicle capacities against intended use
- systematically use stock control records and chemical register or manifest.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- chemicals' routes of entry into human body and potential symptoms of exposure
- company procedures, including:
 - dangerous goods in use
 - documentation requirements
 - emergency response procedures
- compliance requirements relevant to maintaining pest management equipment and pesticide storage area
- content and industry terms used in work order specifications

- hazards and risks involved in preparing, using, securing, storing and disposing of pest management chemicals
- pest management equipment types and functions
- product knowledge, including manufacturer specifications for pest management products being stored and transported
- prohibited areas for pest management vehicles
- suitable vehicle cleaning locations that comply with relevant environmental requirements
- types and availability of vehicle equipment
- vehicle types and specifications suitable to pest management operations.

Assessment Conditions

Suitable assessment of performance requires:

- equipment:
 - as listed in the range of conditions
- contingencies:
 - spill management, using spill kit
- materials:
 - pesticides
- specifications:
 - company policies and procedures
 - manufacturer specifications
 - safety data sheets
 - plain English guides to compliance requirements
- physical conditions:
 - suitable pest management vehicle
- relationships with team members and supervisor:
 - work may be completed individually or as a team member
- timeframe:
 - according to work order.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.
