Assessment Requirements for CPPPMT3042 Install physical termite management systems

Release: 1

Assessment Requirements for CPPPMT3042 Install physical termite management systems

Modification History

Release 1.

Replaces superseded equivalent CPPPMT3042A Install physical termite barriers.

This version first released with CPP Property Services Training Package Version 2.

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must install one type of physical termite management system to manage subterranean termites in two premises with different types of construction.

In doing the above, the person must also:

- carry out correct procedures prior to and during installation of physical termite management system
- communicate to support team and ensure safe and effective workplace operations
- comply with:
 - company policies and procedures, including quality assurance
 - compliance requirements
 - product installation specifications
- identify hazards and risks associated with each installation
- safely and effectively use hand and power tools, plant and equipment
- apply safe work methods when:
 - identifying hazards and controlling risks
 - manual handling
- achieve outcomes in relation to work orders.

Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- company procedures, including:
 - emergency response procedures
 - health and safety procedures
 - manual-handling techniques
 - reporting channels
- compliance requirements relevant to installing physical termite management systems
- construction methods and materials, including:

- concrete slabs
- footings
- wall frames
- content and industry terms used in work order specifications
- hazardous substances that may be present in the workplace during installation work
- product knowledge, including manufacturer specifications for equipment and products being used
- subterranean termite ecology as related to termite management system installation
- types and applications of installation equipment.

Assessment Conditions

Suitable assessment of performance requires:

- equipment:
 - installation equipment and tools required for the type of termite management system
 - personal protective equipment (PPE) as listed in the range of conditions
- materials:
 - termite management system as listed in the range of conditions
- contingencies:
 - managing situations where previous trades construction work is not completed according to plans provided in work order
- specifications:
 - company policies and procedures relating to installing physical termite management systems
 - installation specifications and procedures
 - manufacturer specifications for equipment used during installation
 - plain English guides to relevant legislation codes and standards
 - safety data sheets (SDS)
 - work orders
- physical conditions:
 - premises requiring installation of physical termite management systems
- relationships with team members and supervisor:
 - work may be completed individually or as part of a team and supervised by a person holding a licence to control timber pests
- relationship with client:
 - consultation with client required
- timeframe:
 - according to work order.

Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.
