Assessment Requirements for CPPSEC3040

Coordinate installation of security equipment and systems

Release: 1

Assessment Requirements for CPPSEC3040 Coordinate installation of security equipment and systems

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3040A Plan and coordinate installation of security equipment and system. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by coordinating the installation of three different security equipment and systems to meet client requirements.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when coordinating the installation of security equipment and systems:
 - health and safety including personal protective equipment (PPE)
- contingency factors that may arise when installing security equipment and systems
- documentation to be completed when coordinating security equipment and system installations
- functions and operational parameters for a range of security equipment and systems:
 - access control systems
 - audible and visual warning devices
 - cameras and monitors
 - commercial and residential alarm systems
 - detection devices
 - electronic and mechanical fire safety and fire locking systems
 - electronic locks and locking systems
 - electronic readers
 - electronic screen equipment
 - intercoms and control panels
 - security doors and door controls
- installation methods and procedures for a range of security equipment and systems

- methods for identifying performance faults, errors or omissions when comparing commissioning and test results against system performance specifications
- methods for supervising and checking work progress against installation plans and schedules
- resource requirements for the installation of security equipment and systems
- scheduling methods
- typical hazards encountered when installing and inspecting security equipment and systems and the control measures for each:
 - confined spaces
 - electrical
 - hazardous materials and chemicals
 - people in the work area
 - power tools
 - vermin
 - work at heights.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation and PPE for security equipment and system installations required to achieve the performance evidence.
