# **Assessment Requirements for CPPSEC3043**

## **Establish and test electronic monitoring parameters for security equipment and systems**

# **Assessment Requirements for CPPSEC3043 Establish and test electronic monitoring parameters for security equipment and systems**

## **Modification History**

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3043A Establish and set up electronic monitoring parameters. Updated to meet the Standards for Training Packages.

## **Performance Evidence**

To demonstrate competency, a candidate must meet the performance criteria of this unit by establishing and testing electronic monitoring parameters for two different security equipment and systems.

## **Knowledge Evidence**

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when establishing and testing monitoring parameters for security equipment and systems:
  - documentation and reporting
  - licensing requirements and limits of own authority
  - privacy requirements
  - work health and safety
- common electronic monitoring equipment and system configurations and programs
- common faults and malfunctions in security equipment and systems used for electronic monitoring
- common keypad and control panel types and functions associated with electronic security systems and equipment
- computer software and software templates used for monitoring functions in security systems
- key considerations when formulating monitoring parameters:
  - alarms
  - functions monitored
  - levels of access and access times
  - levels of integrity of systems
  - passwords and codes

- recording functions
- response requirements
- documentation to be completed when establishing and testing monitoring parameters for security equipment and systems
- methods for interpreting transmitted test data and comparing against test requirements to evaluate monitoring performance and functions
- methods for testing and evaluating performance and functions of a range of electronic monitoring equipment and systems and identifying errors or deviations
- operating principles and functions of a range of electronic monitoring equipment and systems
- procedures for testing monitoring parameters
- software templates for electronic security equipment and systems
- types and operation of computer software used for monitoring functions.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, computer, software, electronic security equipment and systems and associated documentation required to achieve the performance evidence.
