Assessment Requirements for CPPSEC3045

Assess security equipment and systems to specify required modifications

Release: 1

Assessment Requirements for CPPSEC3045 Assess security equipment and systems to specify required modifications

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and is equivalent to CPPSEC3045A Determine security equipment and system modifications. Updated to meet the Standards for Training Packages.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by specifying required modifications to meet changed operational requirements of three different types of security equipment and systems.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when specifying modifications to security equipment and systems:
 - licensing requirements and limits of own authority
 - privacy requirements
 - reporting
 - work health and safety
- configuration options for a range of security equipment and systems
- considerations to ensure protection of IP networked security systems and equipment when specifying modifications
- documentation to be completed when specifying modifications to security equipment and systems
- materials, tools and equipment used when specifying modifications to security equipment and systems
- methods for evaluating design options when selecting preferred modifications
- principles of security system design, specifications and configurations
- principles of security system programming and configuration
- sources of historical information and operational data used when assessing functions and capabilities of security equipment and systems
- techniques for drawing and drafting used when specifying modifications to security equipment and systems
- types and functions of a range of security equipment and systems.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, equipment, tools and materials and security equipment and system information required to achieve the performance evidence
- information technologies to source and present information to support work tasks.
