Assessment Requirements for CPPSEC3117 Carry, operate and maintain shotguns for security purposes

Release: 1

Assessment Requirements for CPPSEC3117 Carry, operate and maintain shotguns for security purposes

Modification History

Release 1.

New unit.

This version first released with CPP Property Services Training Package Version 7.0.

Performance Evidence

To demonstrate competency in this unit, a person must carry, operate and maintain shotguns for security purposes in:

- one dry fire environment
- one live fire shooting range.

On each occasion, the person must demonstrate:

- loading and unloading techniques:
 - administrative loading
 - combat load
 - loading for car carry
 - downloading to car carry
- compliance with fundamentals of shooting principles:
 - grip
 - stance
 - trigger control
 - sight alignment and picture
 - breathing
 - follow through.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when carrying, operating and maintaining shotguns for security purposes:
 - carriage and use of firearms and weapons
 - duty of care
 - licensing requirements and limits of own authority
 - range rules at approved shooting range

- selection and use of ammunition
- selection and use of duty gear
- use of force
- workplace health and safety (WHS)
- approved communication terminology, call signs and radio channels used in the security industry
- approved course of fire
- different procedures for operating various shotgun types and models
- duty gear required for carrying and using shotguns
- effective range of law-enforcement ammunition
- firearms retention techniques
- fundamentals of shooting including grip, stance, trigger control, sight alignment and picture, breathing and follow through
- legal consequences of pointing and firing a shotgun outside of an approved range
- loading and unloading techniques including administrative loading, combat load, loading for car carry and downloading to car carry
- low light shooting techniques
- methods for discharging multiple shots at same target and multiple targets
- nomenclature of modern law-enforcement ammunition
- nomenclature of modern law-enforcement shotguns
- operating sequence and principles of shotguns
- personal protective equipment (PPE) required when carrying and using shotguns and using an approved range
- procedures for attending an approved shooting range
- procedures for responding to multiple threats
- process of dynamic risk assessment and how it is applied
- reasons finger must remain off trigger until target is sighted
- rules of approved shooting range
- situations where it is appropriate to draw or use a shotgun to manage a perceived threat according to the use of force model
- techniques for proving a shotgun: point in a safe direction, remove ammunition, observe chamber, verify feeding path, and examine bore for obstructions
- the phonetic alphabet and how it is used
- types of security risk situations that may be encountered during armed assignments and appropriate responses.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessment of performance must comply with jurisdictional regulatory requirements for conducting firearms training and assessment.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to safely and legally carry, operate and maintain shotguns for security purposes
- appropriate documents, materials, and equipment currently used in industry
- shotgun, ammunition, duty gear and PPE to meet work instructions
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.
