Assessment Requirements for CPPUPM3018 Maintain equipment and pesticide storage area in pest management vehicles

Assessment Requirements for CPPUPM3018 Maintain equipment and pesticide storage area in pest management vehicles

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

Supersedes and equivalent CPPPMT3018 Maintain equipment and pesticide storage area in pest management vehicles

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by setting up, stocking and controlling a storage area for equipment and pesticides within a pest management vehicle to ensure the vehicle is fit for purpose.

Equipment in the pest management vehicle must include:

- bunding and spill kit
- inspection equipment
- lockable storage areas
- pesticide application equipment
- pesticide measuring and mixing equipment
- spare parts and consumables
- waste disposal containers
 - personal protective equipment (PPE):
 - eye, ear and respiratory protection
 - first aid kit appropriate for a range of tasks and locations
 - personal protective clothing
 - soap and towel
 - sun protection.

Pesticides and chemicals in the vehicle storage area must include:

- cleaning agents
- dangerous goods
- flammable products
- insecticides and rodenticides.
- Safety information stored in the pest management vehicle must include:
 - chemical co-location, separation and segregation information
 - chemical manifests and registers
 - dangerous goods diamonds

- emergency management plan
- manufacturers' instructions for stored equipment
- product labels for stored chemicals
- safety data sheets (SDS) for stored chemicals.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- chemicals' routes of entry into the human body and potential symptoms of exposure
- areas from which pest management vehicles are prohibited
- chemical storage, container and labelling requirements
- compliance requirements associated with maintaining pest management vehicle storage areas:
 - Australian standards, quality assurance and certification requirements
 - industry guides, advisory standards and codes of practice
 - environmental requirements:
 - clean up, containment or isolation of hazards
 - emergency chemical spill control measures
 - hazardous materials handling
 - waste handling and disposal
 - key requirements of commonwealth, state and territory legislation and local government regulations:
 - chemical use, registers and manifests
 - dangerous goods
 - environmental protection
 - licensing for pest management
 - licensing for vehicle operation and chemical transport
 - mandatory notifications
 - public health and safety
- equipment stored within pest management vehicles:
 - inspection tools and equipment:
 - camera
 - hand lens
 - ladder
 - measuring tape
 - mirror
 - moisture meter
 - pliers
 - probes or knife
 - report check sheet or notepad

- sounding tools
- specimen bottle
- torch
- PPE:
 - eye, ear and respiratory protection
 - personal protective clothing
 - soap and towel
 - sun protection
- vehicle equipment:
 - bunding and spill kit
 - first aid kit
 - lockable storage areas
 - pesticide application equipment
 - pesticide measuring and mixing equipment
 - spare parts and consumables
 - waste disposal containers
- methods for maintaining stock inventories and rotating stock in pest management vehicles
- pest management vehicle cleaning locations that comply with environmental requirements
- potential effects of pesticides on public health and the environment
- product knowledge and manufacturers' specifications for products stored and transported in pest management vehicle
- purpose of, and information typically contained in SDS
- types of pesticides commonly stored in pest management vehicles, and methods for their safe handling and transport
- typical hazards encountered when maintaining pest management vehicle storage areas, and risk control measures for each:
 - chemical preparation, use, storage and disposal
 - electrical
 - environmental contamination
 - fire
 - lighting
 - manual handling
 - moving vehicles and machinery
 - noise
 - residual pesticides
 - respiratory
 - slips and trips
 - temperature
 - ultraviolet radiation
- vehicle types and specifications suitable to pest management operations
- workplace policies and procedures that apply to pest management vehicles:

- equipment cleaning and maintenance
- records and documentation
- security of equipment, chemicals and vehicle
- vehicle servicing and presentation
- work health and safety:
 - emergency response procedures
 - hazard identification, risk assessment and control using the hierarchy of control
 - injury, dangerous occurrence and incident reporting
 - safe work practices including manual handling.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Evidence of assessment for pest management activities as specified in the performance evidence must be based on documentation and photographic evidence that has been validated by a workplace supervisor. A workplace supervisor is a person duly authorised to perform and validate the work being undertaken. The assessor must be satisfied that the candidate has demonstrated knowledge of spill kit contents and other types of equipment submitted in documentary and photographic evidence.

Candidates must have access to workplace policies and procedures, manufacturers' instructions, information, materials, tools, equipment and PPE required to achieve the performance evidence including:

- a suitable pest management vehicle, spare parts, pesticides and consumables
- SDS, equipment manuals and vehicle safety information, signage and documentation.
