**Assessment Requirements for
CPPWMT3003 Identify and respond to
hazards and emergencies in waste
management**

Assessment Requirements for CPPWMT3003 Identify and respond to hazards and emergencies in waste management

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT3011A Respond to waste emergencies.
- CPPWMT3044A Identify wastes and hazards.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- identifying and controlling six different hazards at a waste management site
- identifying and responding to two different types of emergencies associated with waste management operations, selected from the following:
 - chemical reaction
 - contamination
 - fire
 - gas leak
 - medical waste
 - spillage of solvents and liquid waste.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- identification signage used for regulated or prescribed waste including hazardous class, HAZCHEM codes and dangerous goods
- legislative and procedural requirements applicable to identifying hazards and responding to emergencies in waste management:
 - commonwealth, state or territory legislation, regulations, codes of practice and standards including work health and safety (WHS)
 - classifications of dangerous goods and hazardous substances
 - duty of care
 - incident notification
 - licensing
 - recordkeeping

- procedures for communicating with emergency services personnel during emergency response
- types of emergencies in waste management and associated response procedures:
 - chemical reaction
 - contamination
 - fire
 - gas leak
 - medical waste
 - spillage of solvents and liquid waste
- typical hazards in a waste management workplace and the harm they may cause to people, property and the environment
- waste types, including dangerous goods and hazardous materials
- workplace policies and procedures for WHS and emergency response:
 - communication, consultation and participation
 - documentation and reporting including hazard and incident notification
 - emergency containment and isolation
 - evacuation
 - hazard identification and control using the hierarchy of control
 - injury, dangerous occurrence and incident response and reporting
 - plant and equipment shutdown and isolation
 - personal protective equipment
 - risk assessment and management:
 - principles and purpose of risk management
 - processes for conducting risk assessment
 - hazard identification by job, analysis and work site inspections
 - recording hazards and risk assessments
 - signalling techniques.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, WHS information and documentation, waste, equipment and hazard and emergency scenarios required to achieve the performance evidence.
