Assessment Requirements for CPPWMT3008 Store and monitor contained waste

Release: 1

Assessment Requirements for CPPWMT3008 Store and monitor contained waste

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT3017A Store waste.
- CPPWMT3025A Monitor contained waste.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- storing and monitoring contained waste according to job schedule on two separate occasions, and on each occasion:
 - identifying two potential hazards in the storage area and implementing required controls using the hierarchy of risk control
 - identifying one non-conformance associated with stored waste.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- legislative and procedural requirements applicable to storing and monitoring contained waste and relevant to the workplace:
 - Australian standards and codes of practice
 - commonwealth, state and territory legislation and regulations in the state or territory of operation, including work health and safety (WHS)
 - classifications of dangerous goods and hazardous substances
 - dangerous goods storage
 - environmental protection
 - licence requirements for facility
- compatibilities of waste types, including regulated or prescribed waste
- methods for checking the integrity of waste containment, including checks for:
 - contamination
 - drum expansion
 - gases
 - leaching
 - leaks

- seals
- spillage
- unstable form
- methods for containing and securing stored waste
- physical properties of waste:
 - density
 - quality
 - shape
 - size
 - volume
 - weight
- safe decanting practices for flammable liquids
- signage requirements for stored regulated or prescribed waste
- types of equipment used when testing contained waste and facility
- typical hazards associated with stored waste and monitoring activities
- waste types
- waste non-conformances and signs of contamination
- workplace policies and procedures for storing and monitoring contained waste:
 - documentation and reporting
 - stock control
 - waste containment, signage and labelling requirements, including labelling of dangerous goods
 - WHS:
 - emergency response
 - hazard identification, risk assessment and control using the hierarchy of control
 - injury, dangerous occurrence and incident response and reporting
 - personal protective equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, job schedules and documentation, waste types, equipment and facility required to achieve the performance evidence.
