Assessment Requirements for CPPWMT4002 Develop waste management plans

Release: 1

Assessment Requirements for CPPWMT4002 Develop waste management plans

Modification History

Release 1 This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to:

- CPPWMT5004A Develop waste management strategies.
- CPPWMT5036A Develop waste management plans.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- developing one documented waste management plan that identifies waste management objectives for:
 - carbon emissions reduction
 - congestion reduction
 - waste avoidance
 - waste minimisation
 - waste recovery and recycling
 - waste management of problematic waste.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- circular economy and objectives to maximise value from resources in the economy
- environmental issues in waste management
- factors to be considered when assessing waste practices and developing waste management plans:
 - access to site
 - environmental issues
 - hazards
 - location of waste containers
 - processing methods
 - production inputs and outputs, dates and schedules
 - recycling options
 - risk management

- site size and specific site requirements
- waste storage and disposal methods
- waste handling
- waste outputs
- waste recovery methods
- waste types
- legislative and procedural requirements applicable to developing waste management plans and relevant to the workplace:
 - commonwealth, state and territory legislation and regulations in the state or territory of operation, including work health and safety (WHS)
 - classifications of dangerous goods and hazardous substances
 - duty of care
 - environmental protection
 - local government bylaws
 - licence requirements
- typical hazards and risks encountered in waste management
- waste hierarchy
- waste storage and transportation requirements for different sites, including multi-use developments and considerations of road congestion and emissions minimisation
- key features of waste management plans
- workplace policies and procedures for developing waste management plans:
 - client service
 - content and format requirements for waste management plans
 - documentation and reporting
 - WHS:
 - hazard identification, risk assessment and control using the hierarchy of control
 - injury, dangerous occurrence and incident response and reporting
 - personal protective equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, waste management documentation and technologies required to achieve the performance evidence.
