Assessment Requirements for CSCSAS029

Manage security

Release: 1

Assessment Requirements for CSCSA029 Manage security

Modification History

Release 1. This is the first release of this unit of competency in the CSC Correctional Services Training Package Release 5.0

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two occasions and include:

- using a range of communication equipment and information sources
- maintaining accurate documentation
- making appropriate security decisions based on the level of risk
- using effective oral and written communication
- following the chain of command when reporting.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- organisational policies and procedures related to security and security documentation
- risks factors related to security
- code of conduct
- duty of care
- emergency codes and alarms
- privacy of personal and sensitive information
- staff roles, responsibility, and delegations in security matters.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.
