Assessment Requirements for CUAGR515 Design and manipulate complex layouts

Release: 1

Assessment Requirements for CUAGR515 Design and manipulate complex layouts

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce and edit at least two layouts according to design brief requirements.

In the course of the above, the candidate must:

- analyse layout requirements in briefs and other information sources
- develop and present layout concepts
- follow graphic studio safe work practices
- use an extended range of tools and features of software with a high level of technical proficiency
- integrate technical and creative processes to produce outcomes that meet design objectives
- evaluate the effectiveness of layouts.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- common features and formats of different types of publications
- sources of information for developing ideas about different layout options
- interrelationships between different visual design components within a complex layout
- current range of software programs available to graphic designers and opportunities and constraints of their application to different technologies
- different graphic file formats and how and why they are used in different contexts
- technical requirements for manipulating and formatting visual components and file types
- file management protocols and procedures for a range of print and web-based publications
- key safety requirements for using computer and keyboard.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- briefs for complex layout work
- information sources
- opportunities to present ideas to others
- graphic design software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.
