Assessment Requirements for CUAPYR403 Plan outdoor fireworks displays

Release: 2

Assessment Requirements for CUAPYR403 Plan outdoor fireworks displays

Modification History

Release	Comments
Release 2	This version released with CUA Creative Arts and Culture Training Package version 2.0. Updated assessment conditions section. Updated modification history section to reflect changed name of training package.
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 1.0.

Performance Evidence

Evidence of the ability to:

- design and plan at least one complete fireworks display that meets client needs
- identify fireworks that are faulty or not quality assured
- develop:
 - a safety management system that includes operational and emergency procedures
 - organisational policy in relation to outdoor fireworks displays
- implement:
 - a quality system for providing fireworks displays
 - organisational procedures for purchasing, transporting, storing and handling fireworks
- negotiate with clients about requirements for outdoor fireworks displays.

Note: If a specific volume or frequency is not stated, then evidence must be provided for each of the above points at least once.

Knowledge Evidence

To complete the unit requirements the individual must:

- provide examples of issues and challenges that typically arise when planning outdoor fireworks displays, along with solutions to address them
- describe issues that need to be addressed in safety management systems
- describe current industry practices that must be considered when operating outdoor fireworks displays

- describe the main issues addressed in state or territory codes of practice in relation to risk and systems management
- explain legislative requirements in relation to purchasing, transporting, storing and handling fireworks
- explain licensing requirements that relate to the operation of fireworks displays
- explain public liability and workers' compensation requirements in relation to operating fireworks displays
- explain legislative requirements in relation to planning, designing and obtaining approval for conducting fireworks displays
- provide examples of statutory requirements and current industry best practice in relation to the operation of outdoor fireworks displays.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- relevant legislative, administrative, specific technical material and prescribed forms and documents
- a set of client needs to develop a fireworks display brief
- a typical client brief for planning a fireworks display
- practical demonstration of skills in a range of situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

Significant health and safety issues impact on the delivery and assessment of skills in pyrotechnics. Assessment of these skills must therefore be undertaken in consultation with state or territory licensing authorities and customised according to the specific fireworks (outdoor, close proximity and/or special effects). Assessors may need to meet additional requirements where stipulated by state or territory regulations.

Assessors must be aware of, and consult with authorities on matters regarding, safety of personnel; safety of crowds and spectators; storage and transportation of pyrotechnic materials; and weather, site and venue conditions. Those seeking to assess competency in this unit must consult with the relevant state or territory licensing authority, and work within the requirements and guidelines set down by those authorities.
