Assessment Requirements for CUAWHS413 Incorporate anatomy principles into skill development

Release: 1

Assessment Requirements for CUAWHS413 Incorporate anatomy principles into skill development

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- apply anatomy principles into own dance practice on at least three different occasions.

In the course of the above, the candidate must:

- gather information about anatomy principles
- apply knowledge of the human skeletal and muscular systems to enhance safe dance practice.

Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- sources of information about anatomy in relation to safe dance practice
- tools and techniques used to analyse performances
- injury-avoidance techniques for dance and movement
- body systems
- main muscles of the body
- bone structure properties
- alignment principles
- relationship between anatomical structures and dance functions
- development, growth and repair processes of skeletal muscle
- interaction between skeletal and muscular systems.

Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to project or work activities that allow candidates to expand their knowledge of anatomy principles.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
