Assessment Requirements for DEFADI001 Hook up external lift loads

Release: 1

Assessment Requirements for DEFADI001 Hook up external lift loads

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation, standards, and organisational policies and procedures
- completing relevant documentation
- identifying hazards, assessing risks and applying risk control measures to minimise, control, eliminate or report identified hazards
- inspecting equipment prior to hooking up externally slung loads to rotary wing aircraft
- reading, interpreting and complying with instructions, organisational procedures and regulations
- securing, rigging and hooking up externally slung loads to rotary wing aircraft
- selecting and using appropriate protective clothing and equipment
- using equipment effectively in the operating environment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aircraft and airfield hazards and relevant control measures
- capabilities of relevant rotary wing aircraft
- external lift hook-up procedures and guidelines
- principles of safe load lifts and static discharge
- relevant emergency incident management plan, and organisational policies and procedures
- relevant safe work practices when slinging loads to rotary wing aircraft
- safe weight limits for externally slung loads to rotary wing aircraft
- relevant manual lifting procedures, particularly related to refurbishing stores.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including organisational procedures, regulations, codes of practice and operation manuals.
