Assessment Requirements for DEFADI002 Assist in establishing and clearing a cargo drop zone

Release: 1

Assessment Requirements for DEFADI002 Assist in establishing and clearing a cargo drop zone

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation, standards and workplace procedures including:
 - work health and safety (WHS)
 - hazard prevention
 - use of manually operated equipment to shift loads
 - housekeeping
- identifying hazards, assessing workplace risks and applying relevant risk control measures
- preparing for drop zone operations including:
 - clearing a cargo drop zone
- reporting and/rectifying potential difficulties in shifting a load
- using manual lifting procedures, particularly related to refurbishing parachutes and drop stores.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- emergency incident management plan, and organisational policies and procedures
- relevant legislation, standards, and organisational policies and procedures
- relevant organisational manual lifting procedures, particularly related to refurbishing parachutes and drop stores
- relevant risk control measures
- relevant safe work practices when clearing a cargo drop zone.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include

requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including organisational procedures, regulations, codes of practice and operation manuals.
