Assessment Requirements for DEFADI005 Work safely and effectively in and around aircraft on the airside

Release: 1

Assessment Requirements for DEFADI005 Work safely and effectively in and around aircraft on the airside

Modification History

This is the first release of this unit of competency in the DEF Defence Training Package

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant organisational procedures
- applying safety, legislative and statutory requirements relevant to the risk assessment
- demonstrating the correct entry and exit points to operating aircraft
- ensuring that all equipment is secured to prevent damage through rotor wash and jet blast
- identifying hazards, assessing risks and implementing control measures
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- reporting identified problems and aircraft/airside hazards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- relevant aircraft weight and balance specifications
- organisational procedures for operating communications equipment
- requirements for completing relevant documentation
- organisational procedures for managing and controlling hazardous situations when carrying out work activities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including operational procedures, regulations, codes of practice and operation manuals.
