Assessment Requirements for DEFADI006 Prepare and rig platform air-drop loads

Release: 1

Assessment Requirements for DEFADI006 Prepare and rig platform air-drop loads

Modification History

This is the first release of this unit of competency in the DEF Defence Training Package

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to varied equipment and operating environments
- applying safety, legislative and statutory requirements relevant to the risk assessment
- identifying hazards, assessing risks and implementing control measures
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- reading, interpreting and complying with instructions, organisational procedures and regulations
- reporting and rectifying any identified problems
- using hand tools and equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- assignment of load areas
- hand tools and equipment manufacture specifications
- platform air-drop rigging procedures and guidelines
- relevant load safe weight specifications
- relevant rigging and air-drop load organisational procedures
- rigging techniques
- woodwork to construct load bases.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including operational procedures, regulations, codes of practice and operation manuals.
