Assessment Requirements for DEFADI007 Load and secure cargo during fixed wing air-land tasks

Release: 1

Assessment Requirements for DEFADI007 Load and secure cargo during fixed wing air-land tasks

Modification History

This is the first release of this unit of competency in the DEF Defence Training Package

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying problem-solving techniques
- applying safety, legislative and statutory requirements relevant to the risk assessment
- communicating effectively with others
- complying with aircraft role and capability limitations
- complying with cargo regulations for air movements
- identifying hazards, assessing risks and implementing control measures
- identifying, interpreting and analysing risk assessment requirements relevant to aircraft work being performed
- monitoring and anticipating operational problems and hazards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aircraft weight and balance principles
- features and differences of loading systems used in various aircraft types
- fixed wing aircraft freight loading and lashing principles
- potential problems that may occur when loading and securing aviation freight, and appropriate action that should be taken in each case
- principles for the safe and effective handling, loading and securing of freight into a fixed wing aircraft
- problem-solving techniques
- risks that exist when loading and securing aviation freight.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include

requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including operational procedures, regulations, codes of practice and operation manuals.
