Assessment Requirements for DEFDCD001 Function in the Australian aerospace environment

Release: 1

Assessment Requirements for DEFDCD001 Function in the Australian aerospace environment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant safety and security practices, operational procedures and regulations
- complying with relevant operational policies and procedures
- identifying a mixture of at least ten civilian and military aircrafts
- identifying and collecting aerospace information
- identifying hazards, assessing risks and identifying control measures
- moving safely on a tarmac and within a maintenance facility
- recognising and anticipating safety and security problems and hazards, and taking appropriate action.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aircraft recognition features
- Australian Defence Force (ADF) bases from which aircraft operate
- ADF aerospace services
- components of an aircraft airframe
- relevant operational policies and procedures
- relevant safety and security regulations, rules, policies and procedures
- roles of ADF aircraft
- safety and security hazards and risks in the aviation workplace
- sectors of the aerospace industry.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include

requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in aerospace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated aerospace operational situations that reflect aerospace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including operational procedures, regulations, codes of practice and operation manuals.
