Assessment Requirements for DEFEAP002 Demonstrate compliance with an enterprise architecture framework

Release: 1

Assessment Requirements for DEFEAP002 Demonstrate compliance with an enterprise architecture framework

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two occasions and include:

- applying information management relating to enterprise architecture
- applying legislation, regulations, policies and procedures relating to enterprise architecture
- demonstrating compliance with enterprise architecture framework
- reporting on compliance requiring clear well-supported recommendations
- undertaking analysis in the context of enterprise architecture.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- critical points and criteria for compliance
- equal employment opportunity, equity and diversity principles
- legislation, regulations, policies, procedures and guidelines relating to enterprise architecture, including work health and safety legislation
- principles of process auditing
- relevant business processes including:
 - applications
 - data
 - information
 - information technology
 - infrastructure
 - management
 - security
 - technology
- scope and structure of organisation's enterprise architecture framework.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and workplace scenarios that capture the range of situations likely to be encountered when demonstrating compliance with an enterprise architecture framework
- relevant and appropriate legislation, policy, procedures and protocols relating to enterprise architecture currently used in industry
- capacity for extended observation of the compliance verification process
- applicable documentation including operational procedures, regulations, codes of practice and operation manuals.
