Assessment Requirements for DEFEAP003 Use enterprise architecture tools

Release: 1

Assessment Requirements for DEFEAP003 Use enterprise architecture tools

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least three occasions and include:

- applying organisational policies and procedures
- applying systems analysis
- creating and documenting the required enterprise architecture using the agreed set of enterprise architecture tools
- undertaking technical writing
- using effective communication with diverse stakeholders, including negotiation
- using enterprise architecture tools.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- critical points and criteria for compliance
- information technology strategy including the likely impact on the development of the intended system
- legislation, regulations, policies, procedures and guidelines relating to enterprise architecture, and the public sector work environment
- relevant stakeholders
- scope and structure of organisation's enterprise architecture framework
- relevant systems descriptions and matrices.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and workplace scenarios that capture the range of situations likely to be encountered when using enterprise architecture tools
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- relevant and appropriate legislation, policy, procedures and protocols relating to enterprise architecture
- capacity for monitoring and sampling over an extended period with extensive reference to representatives
- applicable documentation including operational procedures, regulations, codes of practice and operation manuals.
