Assessment Requirements for DEFEXO009

Conduct broken seal inspection

Release: 2

Assessment Requirements for DEFEXO009 Conduct broken seal inspection

Modification History

Release 2. Modifications made to Foundation Skills and Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFEO522A Conduct broken seal inspection.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- Element 2 reworded
- PC 1.2 and 2.3 removed
- Element 1 one new PC

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- applying inspection procedures
- handling dangerous goods and hazardous substances
- identifying damaged ammunition, explosives, non-explosive dangerous goods, or associated components
- identifying faults in explosive packaging, in markings and labels
- maintaining documentation
- using manual handling and team lifting techniques
- using PPE

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes:

- operational knowledge of:
 - application of inspection procedures
 - characteristics and limitations of packaging to be handled
 - functioning of explosives
 - organisational documentation requirements

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.
