Assessment Requirements for DEFEXO061 Render explosive ordnance inert

Release: 2

Assessment Requirements for DEFEXO061 Render explosive ordnance inert

Modification History

Release 2. Modifications made to Foundation Skills and Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFEO719A Render explosive ordnance inert.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 1.2 and 2.4 removed
- PC 3.1 reworded

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes

- applying environmental constraints
- assembling and disassembling explosive components
- breaking down explosive ordnance
- conduct housekeeping
- handling dangerous goods and hazardous substances
- using manual handling and team lifting techniques
- using PPE
- using tools and equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes:

- operational knowledge of:
 - characteristics and limitations of explosive ordnance to be rendered inert
 - effects of environmental conditions
 - operations, characteristics and limitations of tools and equipment required to render explosive ordnance inert
 - organisational documentation requirements
 - procedures for rendering explosive ordnance inert

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.
