Assessment Requirements for DEFEXO084

Apply knowledge of explosive chemistry

Release: 2

Assessment Requirements for DEFEXO084 Apply knowledge of explosive chemistry

Modification History

Release 2. Modifications made to Foundation Skills and Assessment Conditions.

Release 1. This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages.

This unit supersedes and is equivalent to DEFEO001 Apply knowledge of explosive ordnance chemistry.

- Unit code updated
- Content and formatting updated to comply with the new standards
- All PC transitioned from passive to active voice
- PC 2.1 removed

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and includes:

- adhering to relevant work health and safety requirements and operational safety
- analysing and evaluating information
- applying safety, legislative and statutory requirements relevant to explosive chemistry
- conducting research
- identifying relevant information
- interpreting organisation role relevant to explosive chemistry
- using appropriate information technology and software
- writing research reports including recommendations

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and includes:

operational knowledge of:

- decomposition mechanisms of explosives, including:
 - atmospheric effects on the rate of degradation of an explosive
 - signs of degradation in explosive fills
- explosive process
- insensitive munitions
- principles of thermodynamics, including:

- heats of formation
- oxygen balance of explosives
- products of detonation
- principles of atomic theory, chemical bonding and organic chemistry
- properties of explosives and explosive compounds
- toxicology of explosives

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.
