Assessment Requirements for DEFEXO210 Manage explosive ordnance engineering and logistics processes

Release: 2

Assessment Requirements for DEFEXO210 Manage explosive ordnance engineering and logistics processes

Modification History

Release 2. Modifications made to Assessment Conditions.

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adjusting processes to reflect changed circumstances
- communicating with supervisors, suppliers, clients and subordinates
- concluding explosive ordnance processes
- following safety, legislative and statutory requirements relevant to the risk assessment
- identifying, interpreting and analysing risk assessment requirements relevant to explosive ordnance engineering and logistics processes
- identifying, sourcing and allocating relevant resources to the processes
- managing explosive ordnance processes efficiently and effectively
- planning for the conduct of explosive ordnance processes
- preparing complex documents, includes reports, feasibility assessments and organisational plans
- using effective techniques to support teams

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- acquisition processes
- composition of teams, and roles and responsibilities of team members
- explosive ordnance engineering and logistics processes
- feasibility assessment requirements
- instructions and procedures relating to the performance of the processes
- inventory control
- operational safety associated with the explosive ordnance process
- organisational procedures for budgets and financial management
- relevant legislation, organisational policies, procedures and instructions, including work health and safety

- relevant organisational reporting requirements and procedures
- resource and other requirements for the engineering and logistics processes

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.
