Assessment Requirements for DEFFIN008 Provide financial management for materiel acquisition projects

Release: 1

Assessment Requirements for DEFFIN008 Provide financial management for materiel acquisition projects

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying risk management tools and techniques
- developing budgeting models
- identifying financial implications of risks in arrangements
- identifying cost drivers
- managing stakeholder relationships
- negotiating with stakeholders
- performing financial reconciliations
- producing comprehensive reports
- providing technical financial advice
- using complex spreadsheet formulas and functions.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic accounting concepts, including operating, expensed and capitalised costs
- cost drivers
- different stages of a project
- project closure process
- relevant legislation and organisation policies
- the acquisition process
- the acquisition and sustainment agreement development process.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include

requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulated assessment.
