Assessment Requirements for DEFFOR020 Inspect, maintain and test digital forensic equipment

Release: 1

Assessment Requirements for DEFFOR020 Inspect, maintain and test digital forensic equipment

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- inspecting and testing equipment such as computer, recording, communications and organisational specialist equipment
- maintaining equipment, including power checks, software checks and cleaning
- storing equipment in accordance with manufacturer requirements.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable record keeping in accordance with organisational policies and procedures
- manufacturer's requirements and organisational policies and procedures concerning the use, testing, cleaning and servicing of equipment
- work health and safety (WHS) policies relevant to the maintenance, servicing and testing of equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.
