- conducting research into identified issues and identifying relevant information
- formulating and prioritising options for technical regulatory framework advice, and selecting the most appropriate option
- identifying and analysing issue/s surrounding the provision of advice
- identifying, interpreting and analysing risk assessment requirements relevant to work being performed
- preparing and presenting advice reports
- providing specialist technical regulatory framework advice.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- analysis process
- configuration management
- ethical and practical guidelines
- integrated logistic support
- relevant organisational policies, procedures, guidelines and industry standards
- product knowledge related to systems and/or equipment in service in the organisation
- professional codes of practice
- relevant research techniques and information sources
- specialist technical regulatory framework advice and protocols.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools and equipment currently used in industry
- applicable documentation including organisational policies, protocols, procedures, regulations, guidelines, codes of practice and operation manuals.
