Assessment Requirements for DEFINT016

Log target communications

Release: 1

Assessment Requirements for DEFINT016 Log target communications

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant organisational policies and procedures
- applying legislative and statutory requirements relevant to targeted communications
- assessing the situational value of information
- communicating effectively
- following instructions, protocols and directives
- identifying information of value contained within an intercepted communication
- identifying, interpreting and analysing requirements relevant to target communications
- logging intercepted communications
- prioritising and reporting identified information of value relevant to the operation
- using current specialist sensor equipment and procedures across a range of logging activities involving a variety of relevant workplace situations, collection systems and target communications environments.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- communication network systems and architecture
- gist protocols
- international time zones and date lines
- relevant legal requirements including:
 - telecommunications legislation
 - privacy legislation
- relevant organisational policies, protocols, guidelines and procedures
- reporting procedures and formats
- situational value protocols.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and systems currently used in industry
- applicable documentation including organisational guidelines, procedures, regulations, codes of practice and operation manuals.
