Assessment Requirements for DEFINT017

Analyse information for situational value

Release: 1

Assessment Requirements for DEFINT017 Analyse information for situational value

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing data and interpreting information including:
 - applying critical analysis techniques
- applying relevant organisational policies and procedures
- assessing the situational value of information
- communicating effectively with relevant stakeholders
- identifying, interpreting and analysing risk assessment requirements relevant to situational value
- maintaining records, information and repositories
- organising information/data for analysis
- reporting information and outcomes appropriate to the situation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Defence electronic warfare and signals intelligence field context
- methods of information analysis including:
 - association matrices
 - collaborative analysis
 - critical analysis techniques
 - historical analysis
 - link analysis
 - qualitative analysis
 - quantitative analysis
 - trend analysis
- relevant organisational policies and procedures
- relevant reporting protocols and requirements
- situational value of information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, office equipment and resources currently used in industry
- electronic information/record management systems
- relevant information and data for situational value analysis
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
