DEFMIL022 Operate remote sensors to detect targets

Release: 1

DEFMIL022 Operate remote sensors to detect targets

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA002B Operate remote sensors to detect targets. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to install sensors as directed by the operational plan in order to detect targets and to provide information to a remote control facility.

This unit was developed for those working in Defence as combat arms personnel required to install sensors as directed by the operational plan in order to detect targets and to provide information to a remote control facility in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team and will be under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for operation	1.1 Receive purpose and requirement of the surveillance activity from written or verbal instructions issued by supervisor. 1.2 Confirm task specifications and clarify where necessary with supervisor. 1.3 Identify and select surveillance equipment required for the task. 1.4 Check surveillance equipment for serviceability.
2. Prepare and maintain a location	2.1 Occupy designated position, establish reference points and document information. 2.2 Deploy surveillance equipment. 2.3 Confirm optimal configuration with supervisor. 2.4 Test equipment to ensure functionality. 2.5 Camouflage site. 2.6 Maintain communications with stakeholders. 2.7 Conduct operational maintenance.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA002B Operate remote sensors to detect targets.

Assessment Requirements for DEFMIL022 Operate remote sensors to detect targets

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying operational safety
- conducting equipment maintenance
- applying fieldcraft skills including tactical movement and camouflage
- selecting the appropriate configuration and location of remote sensors
- installing and maintaining remote sensors physically
- maximising the desired coverage of hostile areas

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- characteristics and effects of hostile and friendly equipment and weapons
- nature of the threat environment
- relevant WHS constraints
- Rules of Engagement
- sensor equipment characteristics and limitations
- tactical techniques and procedures
- target recognition

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
