Application

This unit describes the skills required to install sensors as directed by the operational plan in order to detect targets and to provide information to a remote control facility.

This unit was developed for those working in Defence as combat arms personnel required to install sensors as directed by the operational plan in order to detect targets and to provide information to a remote control facility in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work as part of a team and will be under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs. They would perform specific tasks in a broad range of unpredictable contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.
