DEFMIL026 Perform an individual static line parachute descent

Release: 1

DEFMIL026 Perform an individual static line parachute descent

Modification History

Release	Comments
1	This unit was released in DEF Defence Training Package release 1.0 and meets the Standards for Training Packages. This unit supersedes and is equivalent to DEFCA012 Perform an individual static line parachute descent. • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 4.5 removed • PC 4.6 revised

Application

This unit describes the skills required to perform static line parachute descents carrying combat equipment by day or night. The addition of combat equipment adds considerable weight and bulk which affects all aspects of the descent.

This unit was developed for Defence personnel required to perform static line parachute descents carrying combat equipment in a deployed operational environment but is applicable to any individual in this field of work.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently and as part of a team under direct and/or indirect supervision. They would use discretion and judgement, and take responsibility for the quality of their outputs while performing specific tasks in a broad range of unpredictable contexts.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Military Skills

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for static line parachute descent carrying combat equipment	1.1 Confirm instructions to conduct a static line parachute descent with combat equipment. 1.2 Select and fit equipment and inspect for serviceability. 1.3 Quarantine and report unserviceable equipment.
2. Complete on board aircraft procedures carrying combat equipment	2.1 Board aircraft with equipment and position and secure both self and equipment. 2.2 Communicate verbally and non-verbally with other personnel on board. 2.3 Carry out safety checks.
3. Exit from the aircraft and descend carrying combat equipment	3.1 Exit aircraft carrying combat equipment using approved techniques. 3.2 Conduct relevant drills to detect and rectify malfunctions. 3.3 Maintain situational awareness maintained during day or night descents. 3.4 Communicate verbally and non-verbally with other paratroopers as required. 3.5 Control canopy using basic flight and canopy control techniques. 3.6 Carry out in flight combat equipment drills. 3.7 Assess emergency situations and apply the correct drills to rectify the situation.
4. Land on a drop zone with combat equipment	4.1 Identify designated drop zone. 4.2 Lower combat equipment. 4.3 Apply landing and/or emergency landing techniques to land in accordance with environmental conditions. 4.4 Apply harness release and drag procedures. 4.5 Clear drop zone.
5. Complete static line post descent procedures	5.1 Review performance during the individual static line parachute descent. 5.2 Complete log card.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading NA					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to DEFCA012 Perform an individual static line parachute descent.

Assessment Requirements for DEFMIL026 Perform an individual static line parachute descent

Modification History

Release	Comments
1	These Assessment Requirements were released in DEF Defence Training Package release 1.0 and meet the Standards for Training Packages. Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying situational awareness during canopy flight
- using exit techniques canopy control techniques landing techniques
- carrying out basic flight drills malfunction drill
- applying harness release and drag procedures
- conducting individual safety checks
- undertaking day or night static line parachute descents while carrying combat equipment
- applying approved procedures, techniques and drills for exiting aircraft, canopy flight and landing while carrying combat equipment
- applying correct drills for emergency situations while carrying combat equipment

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- emergency situations

Assessment Conditions

Competency should be demonstrated over time and across a range of simulated or actual workplace situations, including a number of individual static line parachute descents with combat equipment and including at least one night descent, supported by simulated malfunctions and other emergencies.

Competency must be assessed during the preparation and performance of actual static line parachute descents by day or night carrying combat equipment, although due to safety limitations, assessment of the individual's response to malfunctions and other emergencies will need to be undertaken in a simulated environment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.
