**Assessment Requirements for DEFPET006
Assist in the operation of the tank fabric
collapsible marine system**

Release: 1

Assessment Requirements for DEFPET006 Assist in the operation of the tank fabric collapsible marine system

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying Australian dangerous goods codes including:
 - segregation and storage requirements
- applying relevant legislation, statutory requirements, and organisational policies and procedures
- assisting in the operation of the tank fabric collapsible marine (TFCM) system
- controlling fuel spills
- dealing effectively with unplanned events
- handling cleaning chemicals
- identifying hazards, assessing risks and implementing control measures
- interpreting fuel markings and panels
- interpreting technical diagrams and publications
- operating fuel pumping and discharge systems
- responding to emergencies in accordance with emergency response plans
- selecting and fitting appropriate personal protective equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian dangerous goods codes including:
 - segregation and storage requirements
- cleaning procedures and use of cleaning agents
- dangerous goods handling procedures
- emergency response plan
- functions and responsibilities of team members
- hazard control methods associated with fuel products
- maintenance procedures for fuel storage mediums
- relevant maritime dangerous goods marine orders

- relevant legislation, safety and organisational policies and procedures
- TFCM system.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, safety equipment and personal protective equipment currently used in industry including:
 - TFCM system
 - bulk fuel tankers or simulated platform
 - suitable fuel products
 - specific workplace operating procedures and publications
- applicable documentation including operational procedures, regulations, codes of practice and operation manuals.
