Assessment Requirements for DEFPHL006 Monitor water handling and distribution practices

Release: 1

Assessment Requirements for DEFPHL006 Monitor water handling and distribution practices

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least two separate occasions and include:

- applying legislation, regulatory standards and organisational policies and procedures
- communicating and consulting with stakeholders
- implementing control measures of disease transmission
- implementing safe water handling practices
- implementing water quality assurance measures
- interpreting data gathered in the field against quality standards in national water quality guidelines
- recognising unsafe water or water storage containers
- researching causes of disease transmission
- taking action to prevent disease and illness.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aetiology of water-borne diseases
- control measures of disease transmission
- health surveillance system
- relevant legislation, standards, and organisational policies and procedures
- risk management principles
- safe water handling practices and guidelines.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include

requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment, stores and personal protective equipment currently used in industry
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.
