- relevant legislation, and operational policies and procedures
- risk management principles
- role and capabilities of other health care providers
- safe workplace practices as they relate to the operational environment
- structure, function and layout of deployed capability
- team leadership management principles
- time management strategies to set priorities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations based on a range of operational situation from recent and historical experience to tailor tasking
- relevant and appropriate materials, tools, equipment, stores and personal protective equipment currently used in industry
- dependent personnel (team leaders and team members)
- relevant documentation including operational procedures, regulations, codes of practice and operation manuals.
