Assessment Requirements for DEFRNG013 Control training area and range activities

Release: 1

Assessment Requirements for DEFRNG013 Control training area and range activities

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing, interpreting and applying relevant legislation and training area and range (TAR) guidance, including at least two of the following:
 - Defence policy
 - work health and safety (WHS) legislation
 - TAR Standing Orders
 - TAR operating plans
 - emergency plans
 - environmental plans
- checking ammunition safety traces and danger area templates
- evaluating compliance of and controlling TAR activities
- following instructions/directives and reporting information
- reading technical specifications, maps and diagrams
- reviewing and maintaining TAR Standing Orders.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- ammunition danger areas
- exercise instructions
- negotiation techniques
- post-activity reports
- range clearance certificates
- range danger area safety traces
- range instructions
- range practices
- standing operating instructions
- TAR Standing Orders

- weapon systems characteristics.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulated assessment.
