Assessment Requirements for DEFRNG015 Inspect, maintain and monitor training area and range activities

Release: 1

Assessment Requirements for DEFRNG015 Inspect, maintain and monitor training area and range activities

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing, interpreting and applying relevant legislation and training area and range (TAR) guidance, including at least two of the following:
 - Defence policy
 - work health and safety (WHS) legislation
 - TAR Standing Orders
 - TAR Operating Plans
 - emergency plans
 - environmental plan
- applying and monitoring environmental plans
- following instructions/directives and reporting information
- identifying and monitoring contaminants and hazards
- inspecting TAR infrastructure
- reading technical specifications, maps and diagrams.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- decontamination processes
- environmental plans
- maintenance and remedial processes
- safety aspects of TAR infrastructure
- standing operating instructions
- TAR contaminants and hazards
- TAR Standing Orders.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulated assessment.
