DEFSS00013 Defence Heavy Vehicle Recovery Skill Set

Release 1

DEFSS00013 Defence Heavy Vehicle Recovery Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to DEFSS00003 Defence Heavy Vehicle Recovery.

Description

This skill set allows for the attainment of competencies required to recover heavy vehicles and equipment that have become bogged or broken down, and due to terrain or environmental factors, cannot be extracted by other means.

Pathways Information

The DEFSS00013 Defence Heavy Vehicle Recovery Skill Set is part of the DEF Defence Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

A total of 2 units of competency must be attained.

DEFVEH001	Conduct recovery vehicle operations in a field environment
DEFVEH002	Extract disabled equipment using winching techniques in a field environment

Target Group

This skill set covers the competency required by Defence personnel to recover equipment and vehicles that have become bogged or broken down, and due to terrain or environmental factors cannot be extracted by other means.

Typically, operations are conducted by personnel acting independently or in charge of a small team, operating in remote environments isolated from assistance or supervision.

Suggested words for Statement of Attainment

This skill set meets industry requirements as specified in the DEF Defence Training Package for work in recovering heavy vehicles and equipment that have become bogged or broken down and which, due environmental factors, cannot be extracted by other means.
