DEFWDV002 Support SCUBA diving operations from the surface

Release: 1

DEFWDV002 Support SCUBA diving operations from the surface

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit specifies the skills and knowledge required to support self-contained underwater breathing apparatus (SCUBA) diving operations from the surface by acting as a 'lazy shot/bailout operator' and/or diver's attendant in an open water environment.

It includes preparing bailout cylinder, rigging 'lazy shot' and attending to SCUBA (air) diver/s from the surface.

The lazy shot/bailout operator's purpose is to mark the required decompression depth (through the use of the lazy shot) for ascending divers to service their decompression requirements. As part of the lazy shot rig, additional supplies of air (bailout cylinders) are provided in the event that divers' personal supplies expire prior to surfacing. This can occur when multiple and/or lengthy decompression periods must be served.

The diver's attendant covers all aspects of assistance given to a diver in preparation for the dive, the conduct of the dive (such as managing and monitoring safety/communications lines) and the post dive refurbishment of equipment.

This unit was developed for Defence divers but may be applicable to anyone in this field.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Persons undertaking this unit work under supervision and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Work Diving

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1 Prepare bail-out cylinder and rig lazy shot | 1.1 Inspect and prepare lazy shot, cordage and bail-out cylinder

1.2 Deploy and set lazy shot, cordage and bail-out cylinder at required depth for decompression stop, in accordance with dive plan

1.3 Ensure adjustment for subsequent decompression stops in accordance with dive plan

1.4 Re-stow lazy shot, cordage and bail-out cylinder |
| 2 Attend to a SCUBA (air) diver from the surface | 2.1 Assist diver in fitting and inspecting dive equipment prior to undertaking dive

2.2 Assist diver's entry into, and exit from, the water

2.3 Ensure diver's equipment is confirmed for fit and absence of leaks on entering the water

2.4 Manage diver's safety line throughout the dive

2.5 Interpret and respond to all line signals between diver and supervisor

2.6 Report diver's condition, position and progress to supervisor as required

2.7 Assist diver from the surface during a poor visibility search

2.8 Assist diver in the removal and stowage of equipment |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is not equivalent to DEFVDV002B Support SCUBA diving operations from the surface.
