**DEFWDV024 Dive using closed-circuit
breathing apparatus (O₂) in open water to a
maximum depth of 10 metres**

Release: 1

DEFWDV024 Dive using closed-circuit breathing apparatus (O2) in open water to a maximum depth of 10 metres

Modification History

Release 1. This is the first release of this unit of competency in the DEF Defence Training Package.

Application

This unit describes the performance outcomes, skills and knowledge required to dive using closed-circuit breathing apparatus (CCBA) (O2) in an open water environment to a maximum depth of 10 metres.

It includes operating the oxygen compressor/hand-booster pump, inspecting and operating CCBA (O2) equipment, and conducting CCBA (O2) specific contingency drills.

This unit relates, in part, to existing standards in the Australian Diver Accreditation Scheme (ADAS).

This unit applies to persons working as Defence divers but can apply to others working as work divers.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies, dive plan and procedures must be consulted and adhered to.

Persons undertaking this unit work independently and perform specific tasks in a range of contexts that could be unpredictable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Defence Work Diving.

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Operate a CCBA (O2) compressor and/or hand-held booster pump

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1** Inspect O2 compressor and associated equipment for serviceability and correct gas make-up in accordance with dive brief
 - 1.2** Fit appropriate protective equipment in accordance with organisational procedures
 - 1.3** Charge O2 gas cylinders to maximum working pressure and record details in relevant logs in accordance with organisational procedures
 - 1.4** Conduct operator level maintenance on O2 compressor and/or hand-held booster pump and report defects, as required, in accordance with operational procedures
 - 1.5** Undertake compressor post-activity serviceability checks in accordance with manufacturer specifications and report defects, as required, in accordance with operational procedures
-
- 2.1** Select, inspect and fit CCBA (O2), and conduct apparatus test prior to entering water and in-water, in accordance with dive plan
 - 2.2** Use CCBA (O2) during dive operations and demonstrate relevant dive contingencies in accordance with organisational procedures and dive plan
 - 2.3** Complete post-dive CCBA (O2) equipment serviceability checks and report defects, as required, in accordance with organisational procedures

2 Conduct CCBA (O2) dive operations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions may be found in the DEF Defence Training Package Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to DEFWDV006 Dive using closed-circuit breathing apparatus (O2) in open water to a maximum depth of 10 metres.
