Assessment Requirements for FBPCEL3016 Perform second distillation (pot still brandy) operations

Release: 1

Assessment Requirements for FBPCEL3016 Perform second distillation (pot still brandy) operations

Modification History

Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical Training Package Version 2.0

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has performed at least one second distillation (pot still brandy) operation including:

- accessing workplace information to identify distillation requirements
- selecting and fitting appropriate personal protective equipment (PPE)
- checking supply and status of materials before commencing pressing operation
- preparing and confirming status of equipment and services before commencing second distillation operations
- setting up and starting up the process, including any tests or procedures required by regulation
- monitoring the process
- taking corrective action in response to non-conformance results
- shutting down the process after pressing operations are completed
- conducting work according to legislative, environmental and health and safety requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose of second distillation operations and the links between second distillation and other processes used in wine operations
- alcoholic strength of distillation product and final product
- legislation, regulation and workplace licence requirements related to fortified spirits for:
 - Australian Taxation Office (ATO)
 - border control
 - customs and excise

- quality characteristics and uses of a range of distillation products, including:
 - fortifying spirit
 - commercial and premium brandy
- methods used to monitor the process
- common causes of non-conformance results for product, process and equipment and corrective action required including:
 - issues that can be rectified
 - issues that must be reported
- responsibilities for health and safety in the workplace including:
 - health and safety hazards associated with the pressing process
 - methods for controlling risks associated with health and safety hazards
- responsibilities for identifying and controlling environmental issues
- workplace procedures and responsibility for:
 - reporting problems
 - shutting down the process
 - cleaning
 - handling waste
 - recording required information.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - PPE for second distillation operations
 - pot still and distillation equipment and materials required for production
 - documentation or technology for recording and reporting information
- specifications:
 - ATO requirements relating to own role and area of responsibility
 - work instructions and workplace procedures for second distillation operations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
